Let's make flying fun again.

Your paper airplanes never had to make layovers, so why should you? Upjet air offers more direct flights than any other carrier. Less time in the air means more time for something fun. Like sending this paper airplane through your boss' window. Let's make flying fun again.

5 steps to flying fun:

1. Punch out the plane and it's tail along the heavy black line, including the slits.
2. Fold along the fold lines (look at diagrams **a**, **b**, and **c** if you need help).
3. Insert the tail (diagram **d**).
4. Secure the tab into its slit (diagram **e**).
5. Throw at nearest coworker, sibling, or family pet.
